Pearson Education (US), United States, 2005. Mixed media product. Book Condition: New. 6th revised United States ed. 279 x 218 mm. Language: English . Brand New Book. The World of the Cell, Sixth Edition continues the tradition of previous editions widely praised for covering some of the most difficult concepts for students -- bioenergetics, metabolism, enzyme kinetics, thermodynamics, membrane transport, cell signaling, regulatory mechanisms, transcription and translation, signal transduction, and DNA replication and recombination -- at the right level and clarity. The authors integrate coverage of modern molecular techniques and recent research advances without losing students in overwhelming detail. The World of the Cell s trademark features -- Art that Teaches, Multi-level Problem Sets, Quick Check Concept Statements, Guide to Techniques and Methods, and Boxed Essays (Further Insights, Experimental Techniques, and Human Applications) -- help students learn the process of science, not just facts. As cell biology continues to incorporate molecular biology advances, instructors can count on Becker s text to provide strong coverage of basic biochemistry in an easy-to-follow framework, while also offering a balanced coverage of cellular metabolism.
