Ill vii. railway sections, illustrating the geology of the districts passed through. At the meeting of the British Association, held at Glasgow in 1839, a committee was appointed to take measures for procuring coloured drawings of the railway sections before they are covered up, and the sum of 2001. was placed at their disposal for that purpose. In pursuance of these resolutions a blank chart was prepared by Professor Phillips of York, numerous copies of which were circulated. The subject was also brought under the notice of the Institution of Civil Engineers in a paper read by Mr. Sopwith, February 2, 1841. The charts on which the sections are drawn are engraved in small squares of one foot each, on a scale of 40 feet to an inch, and contain a space equivalent to 800 feet in length and 600 feet in height,...
