Such storms may at times have a very wide circle of action and occur practically simultaneously over the whole area. Thus on December 3d, 1896, while I was on my way to Salisbury to establish a meridian line for Dorchester county, I saw in the evening a most brilliant aurora, and the next day while making magnetic observations the behavior of my needle plainly indicated that a magnetic storm was prevailing. I have since then received from a magnetic observatory at Bochum, Germany, established in connection with a mining plant, the tabulated hourly values of the magnetic declination during 1896 and I find that the magnetic storm of December 4 likewise made its appearance at this distant place. The deviations caused by these spasmodic fluctuations in the earth s magnetism may in these latitudes occasionally amount to as much...
