

Quantitative Evaluation of HIV Prevention Programs (Hardback)

By -

Yale University Press, United States, 2002. Hardback. Book Condition: New. New.. 240 x 160 mm. Language: English . Brand New Book. How successful are HIV prevention programmes? Which HIV prevention programmes are most cost effective? Which programmes are worth expanding and which should be abandoned altogether? This book addresses the quantitative evaluation of HIV prevention programmes, assessing for the first time several different quantitative methods of evaluation. The authors of the book include behavioural scientists, biologists, economists, epidemiologists, health service researchers, operations researchers, policy makers, and statisticians. They present a wide variety of perspectives on the subject, including an overview of HIV prevention programmes in developing countries, economic analyses that address questions of cost effectiveness and resource allocation, case studies such as Israel's ban on Ethiopian blood donors, and descriptions of new methodologies and problems.

Reviews

This book is fantastic. It normally fails to price excessive. Your daily life span will likely be enhance once you total reading this publication.

-- **Heath Prosacco**

This is the finest publication we have read through right up until now. Better then never, though i am quite late in start reading this one. Its been written in an remarkably easy way in fact it is only after i finished reading through this book by which basically altered me, affect the way i think.
