Report Volume 57, PT. 3 (Paperback)

By New York State Museum

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 edition. Excerpt: .is frequently attained by interlocking of the ends of the plications along the dorsal line. (Ontaria, Lunulicardium, etc.)1 The minute planktonic shell described by Simroth as *Planktomya henseni* has on the hinge such denticulations as are shown by Buchiola and it seems probable that The convergence of these shells is a consequence of uniform physical conditions, and it has as its result the obliteration of original differences and ancestral generic characters. Hence the determination of phylogeny herein is rendered extremely difficult. Some are doubtless Dimyarians with cardioid affinities (Ontaria, Buchiola, Praecardium), others appear to be allied to the aviculoids and Monomyarians (*Posidonia*, *Kochia*, *Loxopteria* and probably *Lunulicardium*, *Honeoyea*, *Pterochaenia*). The tenuity of the shell rarely permits any indication of muscular scars. In *Lunulicardium*, *Honeoyea* and *Pterochaenia* ontogeny shows that the primitive shell is simple and veneriform in outline, the great hiatus a wholly secondary development....
